Thanksgiving Day.

MONDAY, October 9th has been proscribed Thanksgiving Day, and all business places will be closed. Stores will be open all day Wednesday of next week.

Rule Gas Control Act Illegal

Reaching a decision of far-reaching importance to Turner Valley oil operators, the Supreme Court of Canada handed down judgment in Ottawa yesterday upholding the appeal of Spooner Oil Limited and declaring the Turner Valley Gas Conservation Act ultra vires, as concerning the Sinopec company.

Whether this means, however, that every act of the Turner Valley Gas Conservation Board since its inception has been illegal and that the provincial government can no longer impose restrictions upon the output of gas in Turner Valley, is a question upon which local lawyers would not commit themselves until receipt of the written judgment from Ottawa.

If this should prove to be the case the provincial government may be faced with civil actions for many thousands of dollars as compensation for loss of revenue due to enforcing of regulations under the Turner Valley Gas Conservation Act.

The decision of the Supreme Court of Canada will probably be appealed to the Privy Council by the Alberta government.

Steals Hunting Equipment.

Mr. J. A. McGhee found himself minus his hunting outfit when he reached home Monday night.

On returning from hunting he went to his office to work for an hour and left his car parked at the depot platform. Reaching home he found his gun, hunting coat, overalls and shells, all of which had been left in the back of the car, had been taken.

The matter was reported to the police, but no trace of the culprit has yet been found.

Together On Screen For First Time!

The Barrymore Brothers, John and Lionel appear together for the first time in a film in "Arsene Lupin," the big feature attraction at the Didsbury Picture House this weekend.

A number of the local Masons

attended the annual meeting of District No. 4 at Red Deer on Thursday last.

Members and friends are urged to be present at the monthly meeting of the W.C.T.U. to be held at the home of Mrs. Chamberlain at 7 p.m. on Thursday, October 12th.

Mrs. Hallman, delegate to the prohibition convention held last week in Calgary, will give a report, which those interested will want to hear.

Mr. Ernie Traub, who is teaching at the Sunbury Valley school near Sundre, spent the weekend at his home.

Miss Kathleen McConkey, of Edmonton, and Miss Hatty Law, of Innisfail, members of the teaching staff at Innisfail, were visitors at the home this week.

Gray Sharp and Tom Stanley, electrical engineers will leave today for Jasper Park and St. Paul De Metz to install theatre equipment recently purchased through the Shrey Theatre Supply House at Calgary. Permanent equipment, with new sound screen, is being installed at Innisfail this week. Ken Kremer, manager of the home circuit being in charge of this installation.

LOCAL & GENERAL

Mr. E. G. Raaton made a business trip to Calgary on Wednesday.

Miss Gertrude Kenney, of Olds, is spending a few days with her sister Mrs. Russell Berscht.

Mr. George Julien is relieving at the Sundre Creamery for the next two weeks.

Mr. George Liseimer spent a few days' holiday at the Astex ranch on the Raven River.

Mr. and Mrs. R. Mays, Edmonton spent the weekend with Dr. and Mrs. Clarke.

The new class for boys joining the band will start Monday, October 9 at 7:15 p.m. Boys from 10 years to 50 years will be admitted.

Mr. and Mrs. W. Purdy, of Innisfail, are spending a few days with the latter's parents, Mr. and Mrs. E. Kercher.

A number of the local Masons attended the annual meeting of District No. 4 at Red Deer on Thursday last.

Members and friends are urged to be present at the monthly meeting of the W.C.T.U. to be held at the home of Mrs. Chamberlain at 7 p.m. on Thursday, October 12th.

Mrs. Hallman, delegate to the prohibition convention held last week in Calgary, will give a report, which those interested will want to hear.

Mr. Ernie Traub, who is teaching at the Sunbury Valley school near Sundre, spent the weekend at his home.

Miss Kathleen McConkey, of Edmonton, and Miss Hatty Law, of Innisfail, members of the teaching staff at Innisfail, were visitors at the home this week.

Permanent equipment, with new sound screen, is being installed at Innisfail this week. Ken Kremer, manager of the home circuit being in charge of this installation.

School Athletes Will Meet at Bowden

The Didsbury schools will be well represented at the inter-school track meet which is to be held at Bowden this Friday, and from reports received from the coaches they should make a good showing in many of the events.

The schools taking part in the meet are Crossfield, Carstairs, Didsbury, Olds, Bowden, and Innisfail.

The principal trophy is a silver cup for the school winning the most points. Medals and ribbons will be the award of individual contestants.

Two Trainloads of Wheat in One Day

The movement of grain is still very heavy from the Didsbury yard, and movement this fall has broken all records.

Thursday last two full trains of wheat were shipped, representing two days loading.

A special engine was sent to Didsbury for the purpose, and it made two trips to Calgary the same day.

Another full train of wheat was also shipped out on Monday.

Town Council.

The regular meeting of the town council was held Monday evening, with Mayor Chamberlain in the chair. Councillors Pitt, Spence, Keith, Reiber and Goader were present.

Mr. C. R. Ford appeared before the council and asked that instruments owned by the town be repaired and placed in the Boys' Band. It was decided to repair the instruments on condition that they be kept in good shape by the band.

Mr. Ray Lantz made an offer of \$300 for a small property in Lacknerville, which the council decided to accept. Mr. Neufeld also asked to purchase half a lot adjoining his property in Lacknerville.

Arrears of property taxes came in for considerable discussion. It was pointed out that during the past two or three years the town had been very lenient in regard to the collection of taxes, and that it would be necessary to bring to tax sale after the 1st of December all properties under tax recovery proceedings.

WEDDING

WYMAN—PELECHATY.

A quiet wedding took place at the Knox United Church, Calgary on Wednesday, September 27th, when Miss Annie Pelechaty was united in marriage to Mr. Ward Wyman. The Rev. Mr. Dickson performed the ceremony. The happy couple were attended by Miss Ruby Spoule and Mr. George McKenzie-Grieves.

After a short honeymoon Mr. and Mrs. Wyman took up their residence in Didsbury.

KNOX UNITED CHURCH NOTES

The Harvest Thanksgiving Service will be held (D.V.) on Sunday, October 15th at 7:30 p.m., and the Harvest Home Supper on Monday, October 16th. The guest speaker on the latter occasion will be the Rev. G. W. Kirby, D.D., Calgary

Giants Lead In World Series

The New York Giants are leading the Washington Senators in the world series, which game having taken the first two games, which were played at the Polo Grounds, N.Y. on Tuesday and Wednesday.

In the first game New York won 12 and the second 6-1. The third game will be played at Washington today.

The World Wheat Situation

People who had the privilege of listening to Premier Bennett's speech before the members of the Montreal Board of Trade at the banquet tendered to him on his return from attending the World's Economic Conference, and the Wheat Conference of the leading wheat exporting and importing countries which followed the larger world gathering, undoubtedly learned many things about world matters, and especially wheat, which were entirely new to them and must have impressed them with the magnitude of the problem which now confronts Canada in disposing of its chief article of export.—which wheat.

Prior to the Great War, Canada was rapidly forging ahead to first place among the wheat exporting nations of the world. Gradually the United States, which had been the greatest exporter, was relinquishing her position as a wheat exporter and more and more rapidly approaching the stronger economic position where her production of wheat would not be more than sufficient to meet her own domestic requirements. In fact, it was confidently stated by persons in authority that in a few years the United States would be a wheat-importing rather than a wheat-exporting nation.

Canada, Australia and the Argentine found their markets in Great Britain and the principal countries of continental Europe, France, Germany, Italy, Spain, Holland, Belgium all of which had large quantities of imported wheat either directly from the country or indirectly through the London and Liverpool markets. Then came the Great War. Wheat was in greater demand than ever. Europe was willing to pay almost any price to get it. To meet the demand of the Allied nations it was urged as a patriotic duty upon the people of Canada, equal almost to enlisting in the army, to grow wheat and more wheat. Greater production of food-stuffs was the slogan, and the most intensive organization was directed to bringing about that larger production. The United States again turned to quotas production of wheat because of the prevailing high prices and unlimited market.

The war taught the nations of Europe the lesson of the importance of being able to feed their people in times of war or other emergency. Germany learned the lesson. Italy learned it. France learned it, and, while not directly involved in the war, Spain learned it through the high price she had to pay for wheat and other imported food commodities.

For a time after the war, while the necessary work of reconstruction of their countries and industrial towns and cities was under way, the countries of Europe still offered a good market for imported wheat and at a high price. But the governments of these countries organized to raise more wheat, meet their own requirements and thus safeguard themselves against starvation on the one hand, or the possibility of being required to pay excessively high prices on the other hand in the event of a further war or world emergency. They offered bonuses to their farmers to produce wheat; they fixed maximum high price for domestic grown wheat, they imposed prohibitive tariffs on imported wheat, they arbitrarily governed all importations, and fixed minimum quantities of imported wheat that might be used by millers and in the making of bread.

Premier Bennett outlined the effect of these things in his speech. The four great wheat exporting nations are Canada, Argentina, Australia and the United States, the chief of which is Canada, while the great wheat importing nations are generally listed as being Great Britain, France, Germany, Italy, Spain. But, Premier Bennett pointed out, whereas European countries in 1920 produced approximately 900,000,000 bushels of wheat, in 1923, just three years later, they produced 1,220,000,000 bushels, an increase of 320,000,000 bushels.

Even more illuminating was Premier Bennett's statement that this year France will produce between 75,000,000 and 100,000,000 more bushels of wheat than Canada. Italy will produce 75,000,000 bushels more than Canada; Germany and Spain combined will produce 125,000,000 bushels more than Canada. These countries are the chief buyers of our Canadian wheat; now they are producing more than Canada.

Mr. J. F. Murphy, who was the United States Government delegate to the wheat conference in London, gives the wheat production of these four European countries this year as 1,015,000,000 bushels, against Canada's estimated crop of 300,000,000 bushels, Argentina's 220,000,000 bushels, Australia's 174,000,000 bushels, and United States' 400,000,000 bushels. In other words, these four European countries will produce almost as much wheat this year as the four chief exporting nations. In addition, the Dalmatian countries—Hungary, Romania, Jugoslavia and Bulgaria—will produce in the neighborhood of 327,000,000 bushels. Russia is steadily increasing her wheat production and while unquestionably she over-peopled need it, the Soviet Government nonetheless export large quantities in order to finance necessary purchases abroad.

In the face of this situation, brought about, so Premier Bennett declared, by a condition of things expressed in one little four-letter word, Fear, fear of starvation in the event of a world war, the contingencies still remain. For example, if we, or any other nation, or a group of nations again conspired to pay excessively high prices for imported wheat in order to stave off starvation, the World wheat conference entered into an agreement which provides on the one hand for a limitation of exports of wheat from the chief exporting nations on a reduction in the acreage sown to wheat by the four chief wheat exporting countries, and on the other hand, for a limitation of wheat production by European countries, except Russia, for a removal or some of the restrictions now imposed by European countries designed to reduce the consumption of wheat by the use of substitutes, and for an eventual reduction in the tariff now imposed on imported wheat when the price reaches a certain stipulated point.

Admittedly this agreement is in the nature of an experiment. Whether it will prove practical in actual operation remains to be seen, because there are many factors which enter into the calculation entirely beyond the control of man. However, the facts and figures here presented are undoubtedly of vital interest to the people of Western Canada and provide much food for serious thinking and planning on their part.

Bowel Complaints of Children During the Summer Months

Mother should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry—a remedy that has received the endorsement of legions of Canadian mothers during the past twenty years. It is safe, non-stimulating, non-expulsive. Get "Dr. Fowler's" and be on the safe side.

Prototype Kilogram Valuable

Only About Thirty Standard Measures Are In Existence

A secret mission in the charge of a high official of the London Board of Trade, recently took first, to Paris and then to Sevres, the "British prototype kilogram."

This is Britain's official copy of the "international standard kilogram," on which all metric and scientific measures of weight are based.

At Sevres, which is the home of the international committee of weights and measures, the "British prototype" was compared with the international standard.

These comparisons have been made only once before since 1889.

The international and the British kilogram are each divided into ten parts each on a balance sensitive to a hundredth part of a milligram. There are 28,350 milligrams to an ounce.

The prototype is made of a platinum alloy called iridio-platinum. In spite of the high resistance of this metal to external influences the British kilogram could have changed its weight by a few hundredths of a milligram or so. If minute changes occur they are reported to parliament.

Plans for the journey were kept secret lest bandits might attempt to steal the prototype. A kilogram of iridio-platinum is worth several hundred pounds sterling as metal alone, while a "prototype kilogram" is naturally worth far more than its price as metal, for there are only about 30 in existence—one for each of the principal nations.

Progress In Gold Fields

Large Amount Of Work Done On Labrador Claims

Remarkable progress has been made already in the Labrador gold-fields, according to Hon. W. J. Walsh, Newfoundland's Minister of Agriculture and Mines, who has returned to St. John's from the Lake Wabush district.

He was accompanied on the expedition by Dr. O. K. Sniderup, geologist, and J. W. Flode, mining engineer. All three seemed enthusiastic about the future of Labrador.

They reported that of the 22 concessions granted by the Newfoundland government since the Labrador was opened to prospectors last fall, nearly one-half are being actively investigated by field parties. The Lake Wabush camp, which is reached after a 200-mile aeroplane trip from Seven Islands, Quebec, had a population of 30 when they left.

Mr. Walsh and his party spent a week in the interior. They said flies were unusually scarce. Unsettled weather conditions had interfered somewhat with the work of the field parties but despite this a remarkable amount of work had been accomplished.

Miniature Paintings

Microscope Needed To See Fine Work Of English Artist

Painter of miniatures so small that 20 of them will fit on a postage stamp, Stanley A. Burchett, of London, formerly of the Grenadier Guards, claims that they are the smallest pictures in the world. Two,

about an eighth of a postage stamp in size, have been purchased by a Queen. One is a scene showing a sailing vessel at dawn, and the other a still-life arrangement in a blue vase.

To appreciate the pictures fully it is necessary to use a microscope. Many find it difficult to believe that the miniatures are real water-colors painted with a brush.

Dentistry In Olden Times

Even the ancient Egyptian had to be told to "open wide" and probably had trouble with his false teeth drooping out occasionally, according to Dr. J. K. Lowry, McGill University specialist in his branch of dental science. He told of dental work done by the Egyptians as early as 3400 B.C., in a talk before a local service club. He also described known traces of dentistry among the Greeks, Etruscans and the Romans.

Japanese tea exported during 1932 showed an increase of 4,072,000 pounds over 1931.

More than 250,000 persons are now employed by the British post office department.

Freight Car Was Elusive

Ex-Sergeant Proved He Did Not Abandon His Post

An ex-sergeant brought an atmosphere of comic relief into the military tribunal at Paris, which is still hearing appeals from war-time court-martial sentences, when he successfully appealed against a sentence passed in 1918 of 15 days' imprisonment for twice abandoning his post.

Sergeant Nigon was ordered to escort a freight car containing 5,000 gas masks. When the convoy stopped for the night he went to sleep, and when he awoke up the box-car had disappeared.

The railway authorities assured him it would come back. It turned up two days later.

He was then told the train would proceed again next morning but when he looked for it again it had disappeared. Eventually he discovered it had arrived at its destination without him.

In reply to questions he said he did not sleep in the box-car because a soldier was only allowed to sleep in a horse car during the war. If he had slept next to it on the track he would have been run over. He did not get inside because if he had done so they would not have been able to shut the door. He declared he did not abandon his post because a post is a fixed point, and the box-car was a movable object.

"It was a phantom car," he said. "I kept disappearing."

He was acquitted and the sentence quashed.

Has Radio Wave Pains

Tacoma Dairymen Is Obliged To Ground Himself To Obtain Relief

Scientists have started an investigation into the unique case of Martin Bodker, dairymen in the Tacoma district, who suffers intense pains from radio waves unless he grounds himself.

Tacoma and Seattle specialists have declared they were baffled.

Bodker some years ago began to suffer intense pain. Physicians could find nothing wrong with him, but the pains much like rheumatism, persisted from time to time.

One day he put his hands on a water faucet while suffering pains, and they immediately vanished. When he took his hands off the faucet the pains returned. Bodker wrapped a cane with copper wire, bored a hole through the floor of his living room, and "grounded" himself.

The case was brought to the attention of Los Angeles physicians by one of Bodker's relatives living there, and Bodker was persuaded to go to that city.

Military Command Changes

Toronto Officer Goes To Victoria To Take Over Military District

Major-General E. C. Ashton, C.M.G., D.S.O., district officer commanding military district No. 2, Toronto, is leaving shortly for Victoria where he will take over military district No. 11, which includes the provinces of British Columbia and the Yukon Territories.

Brig.-General T. V. Anderson, D.S.O., district officer commanding military district No. 10, with headquarters at Winnipeg, replaces Major-General Ashton at Toronto, and it is understood Brigadier W. B. Beaman, D.S.O., whose appointment to command military district No. 11 became effective a short time ago, will go to Winnipeg to succeed Brig.-General Anderson.

STRING BEANS BIETONNE

Two tablespoons butter; 1 medium onion; 1 tablespoon flour; 1 cup evaporated milk; 1/2 cup water; 2 cups cooked string beans, cut in one-inch lengths; salt; pepper; paprika.

Melt butter. Fry thinly-sliced onion until yellow, but not brown. Stir in flour. Add gradually evaporated milk and water. Stir until thickened. Add cooked string beans, cut in one-inch lengths and seasoning. (Serves six.)

France has ruled that motion picture films in foreign languages can be shown in only 15 theatres in the country.

Commodity prices in Belgium are increasing.

ASHAMED OF HER FIGURE

Husband Persuaded Her To Take Kruschen

By following her husband's advice, this woman made a tremendous improvement in her appearance—she actually took off 32 lbs. of her excess weight.

"A year ago I was troubled with rheumatism, nervousness and other complaints. And I got so fat that I was ashamed of my figure. I was persuaded by my husband to take Kruschen salts. Before I began, I weighed 161 lbs. After taking Kruschen for short time the man who measured me said my figure was less painful, my nerves got stronger, and my step lighter. Then I knew that Kruschen was doing me good so I persevered with it and got my weight down to 129 lbs. The reduction of 32 lbs. of unwanted fat, I am boasting when I say that I feel younger and more active, have a more trim figure and am healthier than I have been for years."—(Mrs.) J. S. J.

Kruschen is a blend of six mineral salts which assists the internal organs to throw off each day those excess products that would otherwise accumulate in the form of fatty tissue.

Chance Meeting Recalls Rescue During War

Ship Inspector Meets Sailor He Saved From Torpedoed Vessel

A thrilling rescue in the days when British ships carried on a hazardous trade along routes infested with mines and German "subas" was recalled at Montreal harbor when Captain R. H. Monks, deputy port warden, boarded the steamer "Clan Alpin" in the course of an inspection.

Accosted by a member of the crew who asked if he remembered him, Captain Monks found himself unable to recall who the man was. The seaman then proceeded to identify himself as the man whose life the Montreal port official had saved during the Great War when Captain Monks' ship had been torpedoed off the Irish coast. About to jump into the one remaining lifeboat the ship's master remained behind from some place on the deck. Retiring, he found a member of the crew, badly wounded. Picking him up, Captain Monks carried him to the lifeboat only a minute before a terrific explosion sent the ship to the bottom.

After two days on open sea they were picked up by an American destroyer and taken to an Irish port, where the wounded man was given treatment.

Founded Centuries Ago

History Of Bavarian City Dates Back For 1,700 Years

In this year of centenaries, tricentenaries and bicentenaries all over the world, the Bavarian boosters of Weissenburg are inviting all and sundry to celebrate with them the 1,700th anniversary of their city's founding.

It was back in 233 that the hardy local tribesmen first broke through the fortified military road built by the Romans, destroyed the citadel of Biriciaria and built with its stones a castle called the Wizbirn. Fragments of the city wall erected at that time, with 31 towers and a number of big gates, still remain. The Ellinger gate, in particular, is considered one of the finest medieval structures of its kind in all Germany.

Human Loud Speaker

Official possessor of the loudest lungs in the United Kingdom, W. B. Anglis, town crier of Marlborough, Wiltshire, England, aged 63, won the championship from twelve rivals in the National Town-Criers annual contest at Lyne Regis. The three judges sat in a tent 100 yards from the yelling contestants.

Science Steps In To Lend Assistance To Ship Navigation And Safeguard Life and Property

It is of vital importance to a shipmaster that he should know, from time to time, the depth of water beneath his keel. For centuries a bar of lead, greased at its base, was attached to a rope slowly lowered and as slowly raised once every hour to determine it. It was a long stride ahead when steel wires of the utmost strength, of the least possible bulk, displaced weak, heavy and messy ropes. And now steel wire is superseded by a method which employs only sound as its servant. On the keel of a steamship is fastened a resonant anvil, forcibly struck by a hammer every two seconds or so. Sound travels through water better than through air, and four-and-a-half times faster. When the anvil-sounds reach the sea-bottom they are echoed back to the ship with a record of the time occupied in their flight. This tells not only the sea-depth, but a great deal more. Listeners become expert in detecting whether it is a rocky surface, a sandy level, or a stretch of shale which returns a particular note.

Chief among the hazards of navigation is fog. Fortunately fog is penetrable by radio waves of light and by radio waves transmitted in a beam. In a fog an American ship, through its radio apparatus, keeps in touch with at least two of the one hundred radio beacon stations of the United States. With two messages from two stations before him the captain readily knows just where he is, and with little or no slackening of speed reaches port in safety.

Throughout the world today every ship, worthy of the name, has a radio receiver. When that receiver says "S.O.S., save our ship," the captain instantly moves, with utmost pace, to the ship in distress. It is, of course, most desirable that every ship should have a radio operator on board. Two operators would be better still. But even if there is no radio operator in charge, the "S.O.S." signal may be distinctly heard and legibly received by a man newly devolved to recover of high sensitivity and dependability.

For a good many years the weather bureaus of the United States and Canada have rendered an invaluable service by their advance notices of storms and tempests. Thanks, once more, to radio, these warnings are received not only on land but at sea, by every ship in touch with the shore.

Icebergs have dealt death to countless myriads of mariners and their passengers. It might be supposed that a thermometer, immersed outside a ship, would announce the approach of an iceberg. A better tell-tale is a simple apparatus which measures the electrical conductivity of the water surrounding a ship. That conductivity varies with the percentage of salt in the water, so that the comparative freshness of that water gives an alarm to be heeded. By George Hes, author of "Leading American Inventors."

Protects Cultivators Of Land

New Law In Palestine Prevents Eviction Of Tenant

The widely debated ordinance for the protection of cultivators has been officially promulgated in Palestine by the high commissioner, Sir Arthur Grenfell Wauchope.

Any tenant who has occupied and cultivated a tract of land for at least a year becomes a "statutory tenant" under the ordinance. He cannot be evicted if he pays his rent, unless the landlord puts at his disposal in the same vicinity a "subsistence area" approved by the high commissioner.

Dangerous For Dogs

Reports come to us of many fatal results to dogs from playing with rubber balls, dolls or other similar toys. One friend writes of five people known to her whose dogs had died from swallowing pieces of such toys. Post mortems disclosed the rubber as the cause of death. We hope all dog-owners who are thus will guard against this danger. Our Dunn-An-

The Oriental Method

How Chinese General Made Wife Learn To Swim

Swimming is undoubtedly a fine sport, but there are different ways of learning it. In Canada we resort to moral suasion. The Chinese, so unlike us in many respects, use another kind of suasion. A special correspondent of the New York Times in Chengtu writes that General Yang Sen, reformer of Szechuan Province, has caused all the Chinese women to stir themselves in the interest of sex emancipation. It is reported from Tachow, centre of his sphere of activities, that he recently decided all Chinese women should abandon many of the taboos restricting freedom of their sex. He ordered his wife to learn to swim. This she bashfully refused to do. Angered, he forced a peasant woman's costume upon her, then, with a revolver placed at the back of her head, forced her to walk to the nearby river and splash about in full view of the amazed citizenry of the town. About 15,000 persons hastened to witness the spectacle.

BY Ruth Rogers

735

DELIGHTFULLY BECOMING TO THE LARGER FIGURE IS THIS SIMPLE SMART DAY DRESS

It falls so gracefully in fluid lines which are most slimming. The pointed yoke is a particularly helpful feature.

One of the joys of the new season are the attractive striped materials. And how happy they are.

Today's "modest" are, except oddly enough, more revealing than ever and white, so modish. It fits self-trimmed.

Style No. 735 is designed for sizes 14, 16, 18, 20 years, 36 38, 40, 42, 44 and 46 inches bust.

Price, pattern 25 cents in stamps or coin (coin is preferred). Wrap com carefully.

Demand For Fertilizers

Use In Canada Is Showing An Appre- ciable Increase

The use of various chemical fertilizers in Canada is becoming widespread and in normal times reaches considerable proportions.

There were 90 plants engaged in making mixed fertilizers and fertilizer materials in Canada in 1932, the output of which totalled 256,623 tons. Sales of fertilizers in the year under review amounted to 265,442 tons of which 179,860 tons were sold in Canada and \$3,450 tons were exported.

Investigational work with fertilizers is carried on by the Canadian Government Experimental Farms System at its branch farms and stations situated in every province of the Dominion. It has been found that for the majority of crops the use of "complete" fertilizer mixture, one furnishing nitrogen, phosphorus and potash—is best, especially in Eastern Canada and in British Columbia.

The increasing attention given to pasture fertilization in the stock raising and dairy districts of Canada is creating an appreciable increase in demand for fertilizers.

Interested In Tree-Planting

Many Thousands Attend Lectures In Canadian Forestry Car

In a recent twelve-day period the tree-planting car of the Canadian Forestry Association made its annual tour of the prairie provinces, visited over twenty places, giving 28 lectures to a total attendance of around 4,000 people. Adverse weather conditions along the lines visited have made tree planting difficult during the past few years, but interest in the work and a belief in the benefits of tree planting, has not abated.

Since commencing its tour of 1933, the first three months of which were devoted to Saskatchewan, the car has visited 78 communities at which 165 lectures have been held, to a total attendance of 25,000 people, mostly rural dwellers.

The past four years, all over the treacherous plains, have proved that trees can, and are being successfully grown.

Dairy Awards

Manitoba Takes Silver Cup At Cana- dian National Exhibition

Award for the highest scoring creamery butter, the silver cup, has been awarded to the Manitoba creamery, of Minotia, Man., by Canadian National Exhibition judges. The Manitoba creamery scored 97.7.

Although Manitoba butter took the majority of awards as usual, competition from Ontario was keen. The silver medal for the highest scoring 14-pound box of unsalted creamery went to Peel Creamery, Brampton, Ont., with a score of 97.6. The Swift-Camp creamery, of Neepawa, Man., was a close second.

Modern Dairies, Ltd., of St. Boniface, Man., walked off with first prize in the division for salted creamery butter in 20-pound boxes, with the Saskatchewan Co-Operative Creamery of Regina second.

WHEN THE LINDBERGH'S VISITED GREENLAND

Clad in warm garments as a protection against the rigors of the climate, Colonel and Mrs. Charles A. Lindbergh are pictured during their stay at Godthaab, Greenland, where they stopped on their long flight to Copenhagen, Denmark, on aerial route survey. Note the youngsters in Eskimo costume, who greeted the famous couple.

Highway and Park Improvements Being Carried Forward As Unemployment Relief Measures

In addition to their primary functions of serving as places of rest and recreation for the people and as sanctuaries for wild animal life, the National Parks of Canada at present are occupying an important place in the economy of the country, providing work for a large number of the unemployed. This is strikingly brought out in a statement issued by Hon. Thomas G. Murphy, Minister of the Interior, upon his return to Ottawa after a trip through the four western provinces in which he made a personal inspection of the work now being carried on in the National Parks. Mr. Murphy drew attention to the fact that during the fiscal year ending March 31, 1933, more than \$630,000 was expended in the National Parks as a measure of unemployment relief, enabling the Department of the Interior, under the jurisdiction of which this work falls, to utilize the services of a large number of unemployed men, and also to supply the means for their maintenance during such period of employment.

At the present time many projects throughout Western Canada are being carried out under the direction of the National Parks Service. Department of the Interior Relief works are now under way in the Banff, Jasper, Waterton Lakes, and Elbow Island National Parks, and in the Prince Albert National Park in Saskatchewan, and in Randle Mountain National Park in Manitoba. Work is being continued on the Banff-Jasper Highway, which, when completed, will provide a direct connecting link between the headquarters of these two great mountain parks. Construction of that portion of the Golden-Rundle road, known locally as the "Big Bend" Highway, between Delta, B.C., and the Canoe River, is also proceeding under direction of the Manitoba Provincial Service.

From a tourist point of view, the two last-named projects are of great economic importance, for when completed, they undoubtedly will help to swell the great tide of tourist travel to the Canadian Rockies. The "Big Bend" road now under construction forms the last incomplete link in the western half of the Trans-Canada Highway, and will provide a direct route from Winnipeg to Vancouver, through one of the most beautiful scenic regions in North America. Construction of the east leg of 75 miles of the highway, the east extension of National Parks engineers, and more than 50 miles of this undertaking have been graded, of which almost 50 have been surfaced. The western leg or section of the "Big Bend" road is going ahead under the supervision of the Department of National Defence, which has crews of unemployed men at work.

Initiated late in 1931, the Banff-Jasper Highway as planned will entail construction of approximately 140 miles of road, utilizing existing portions between Banff and Lake Louise. A new road, the south entrance to the park, will be built from Lake Louise to the park headquarters at Lake Louise. A new registration gate will be built at the southern entrance to the park. Recreational facilities are also being augmented. The low-lying land near the towns of Waswanipi is being regraded. A new fence is being constructed about the animal park at Andy Lake, and a telephone line is being built from Andy Lake to the park headquarters.

Special attention is being paid to the welfare of the men who are engaged in the various construction works. Accommodation, food, and clothing where necessary are supplied by the Department, while medical attention in all camps is provided for the sick or injured.

Advantage In Low Weight

Under Average Better For People After Middle Age

The man who keeps his waistline slim when he reaches middle age is the most likely to win the race for health, is the conclusion drawn from a new study of the relation of weight to physical defects, published in the Public Health Service. By the time that middle age is reached, these figures indicate, it is a definite advantage to be under the average weight for height, says the report. Overweight people have the worst of it in an analysis of the death rate from 15 causes among men classified as 25 pounds or more overweight; "standard lives" or "normal" men, and those 50 pounds or more overweight.

J. E. GOODER, Editor & Manager

**Have YOU Registered
On Voters List?**

Only very few of the relatives and
tenants have registered on the town
voters list, which has been open for
registration for a month.

It will be remembered that at the
last election there was dissatisfaction
because so few of the tenants and
relatives were on the list, and per-
mission was obtained at that time
to postpone the election. This can
not be done in the future, so if they
neglect to register, the tenants and
relatives will only have themselves
to blame if they are deprived of
their vote at the next election.

There seems to be a misunderstanding
amongst thinking that as they
were on the voters list last year, it
was not necessary to register this
year. According to the Town Act,
it is necessary for both tenants and
relatives to register each year. The
time for registering expires on
October 31st.

The following is the official notice:

**Notice to Relatives of Persons
On the Assessment Roll
And to Tenants**

Notice is hereby given that during
the months of September and October
applications may be made under
the provisions of section 204 of the
Town Act for inclusion in the voters'
list of the Town of Didsbury.

The wife, husband, father and
mother, and every son and daughter
of any person whose name appears
upon the assessment roll, are entitled
to be placed upon the said list—

(a) if he or she is resident
with the said person within the town
or assists him in a business in respect
of which he is taxable; and

(b) if he or she is of the full age
of twenty-one years; and

(c) if his or her name does not
already appear on the roll; and

(d) if he or she duly makes
application in accordance with this
notice.

All tenants who have rented an
assessed parcel for a period of twelve
months immediately preceding the
last day of August of this year, and
who duly make application during
the months of September and October
are entitled to be placed upon the
said list.

TOWN OF DIDSBURY.
W. A. Austin, Sec.-Treas.
August 23rd, 1933.

WEEKLY JOKES

Willie: "Would you lend me
a dollar, Charlie?"

Charlie: "Sure!"

Willie: "Thanks, just give me
fifty cents."

Charlie: "Okay with me, old pal,
here it is."

Willie: "Now you still owe me
fifty cents, don't you?"

Charlie: "Sure Thing!"

Willie: "And I owe you fifty
cents, so that makes us square
again. Goodbye!"

"Kritiks' Korner."

Overheard (comment by a lady):
"Doesn't this town look forsaken
with all the old papers and trash
laying around—even on Main St.?"

We have been enjoying the
flowers in the window of Kaufman's
shop, also those at the office of the
Atlas Lumber Co.

The paint on the front of Mr.
Goehring's place of business is a
great improvement.

We note that Mr. Hardy is clean-
ing up the yard at the back of his
electrical shop, and building a new
fence. I wonder if some of us forget
the backyard? If we must keep
unsightly things in it, we can at least
build a good fence around it to hide
the rubbish from public view. What
is needed is more containers with
covers on so that the trash will not
be blown away by the wind or
scattered by children and others.

— "OBSERVER."

**Don't You
Worry About
Your Car.
Let Us!**

IF YOU will just remember one thing, you can stop
worrying about your car. Remember to come to us
regularly. A trained service man will gladly inspect
the entire electrical system of your car . . . No obligation
incurred, of course . . . You will save money by
having your car looked over by a mechanic who
knows his business. Your Battery, Brakes, Tires, Oil
and Grease will be accurately checked at the same time.

ADSHEAD GARAGE

The Road to RECOVERY

A Statement by the Prime Minister of Canada

WITHIN a few days the Dominion of Canada will offer for public subscription the 1933 Refunding Loan, the purposes and terms of which will be announced in detail by the Minister of Finance on Tuesday, October 10. In this national undertaking an opportunity will be afforded both for sound investment and for public service, and I have no doubts as to the readiness with which Canadian investors will respond.

I feel, however, that the 1933 Loan marks a point in Canadian affairs to which it is only proper that public attention should be drawn as a means of extending justifiable encouragement to many thousands of men and women who have endured adversity with such admirable fortitude.

With due precaution against unwarranted optimism I think I may say that in Canada we are now on the road to recovery. The road may be long and progress may be slow, but the events of the past six months appear to demonstrate with increasing clarity that the downward trend has come to a definite stop and that an upward trend is now in progress.

The evidence of improvement is written in the statistical facts of our industry and trade. These records show that our general economic condition reached its lowest point during the month of February last and that today we are definitely above that level following a recovery which has been gradual but persistent and unmistakable.

The most significant of these figures are probably those dealing with the physical volume of business, wholesale prices and employment, and I give here briefly the record of recovery in each case as shown by the reports of the Dominion Bureau of Statistics.

The index of our physical volume of business, which represents virtually the economic pulse of the nation, stood last February at 67.1. For August, the most recent month for which the index is available, the figure was 89.9, an improvement of approximately 31%.

Wholesale prices, in which even minor changes are highly significant, have risen over 9%, or from an index of 63.6 last February to one of 69.4 in August.

Employment, although still at a regrettably low level, has, nevertheless, been gaining steadily for the past five months. On the basis of partial reports from industrial employers some 116,000 persons have been added to pay-rolls since last April. An estimate by the Bureau on a more comprehensive basis places the total increase in employment at 216,000 during the same period.

Our external trade figures are equally encouraging. Both exports and imports have risen, with the former showing the more rapid increase. As a result, Canada had a favourable trade balance of over \$114,000,000 in the twelve months ended August 31st this year. For the corresponding period last year the favourable balance was only \$38,000,000, and in the two previous twelve months periods instead of favourable figures we had unfavourable balances of \$15,000,000 and of \$103,000,000 respectively.

All these facts and figures I think we may quite safely take as sign-posts on the road to recovery. In our further progress, no single factor will have more significance than the success of our national loan operation. The recent 1½% loan in London was a notable tribute to Canada's credit standing. It was immediately oversubscribed many times and now commands a substantial premium. I feel satisfied that our own people will be quick to perceive that the 1933 Refunding Loan in Canada is at once a challenge and an opportunity—a challenge to aid in the restoration of business recovery and an opportunity to serve thereby their own and their country's best interests.

Of Interest to Cattlemen.

The provincial department of agriculture is desirous that the "feeder" movement be given attention by the cattlemen of the province, especially by those along the Calgary-Edmonton line, which district lends itself to the proposition and is well suited for the purpose, owing to a never-failing supply of feed. The department is anxious that cattle raised on Alberta ranches be grain-fed right in the province rather than shipped off grass to or from the United States for feeding. The southern ranches (who keep their cattle) will supply steers delivered free at all charge at the farmer's nearest shipping point. It is said that the steers will weigh from 700 to 1,000-lbs. The feeder will be allowed the increase in weight he puts on the animals at the price per lb. it sells for next spring. In addition he will be given a bonus of 20 per cent. of the selling price per lb. on the original weight, put on the cattle at the commencement of feeding. This means that if the farmer takes over a lot of steers, average weight 1000-lbs. and sells next spring at 35¢ per lb., he will receive \$1.00 for 100-lbs. or \$10.00 per 1000-lb. steer, which would amount to \$100.00, and with the \$10.00 bonus, make \$25.00 per head for the winter's work.

The contract was signed on a price of grain at 1¢ per lb. and hay at \$8.00 per ton. The cattle will be delivered about October 20th, and action must be quick on the part of any applicant for a supply of cattle. An advertisement in this issue, inserted by the provincial government, is to effect that all farmers desiring the fullest information, will be given same by writing the Dept. of Agriculture at Edmonton.

Slaughter 2000 Buffalo, Wainwright.

Slaughter of 2,000 buffalo in the Wainwright National Park, Alberta, has been sanctioned by the government.

Tenders are being requested for purchase of hides during November and December. The animals to be killed are 500 bulls, 2 years old; 150 bulls, 3 years old; 200 cows, 3 years old; and 1,150 aged bulls and cows.

The buffalo herds in Canada's national parks increase very rapidly, and steps have to be taken periodically to reduce them.

The Wainwright Park has feeding capacity for 5,000 buffalo, the herd at present numbering 7,000. It was reduced last year by 1,200.

The killing of the buffalo will be done on a commercial basis. The herds will be gathered in corrals, and carcasses will be slaughtered with a bullet. The killing will be done by an expert with a rifle, and the carcass will be treated in a government abbatoir in the park. The meat will be sold to the highest bidder.

Homesteads for Dry Area Farmers.

Through the provincial lands and mines department a special area of homestead land in Northern Alberta, southwest of the Little Smoky River (south of Falher) along the Northern Alberta railway, has been set aside for settlement by farmers from dryland areas in southeastern Alberta. All regulations have been prepared, under which settlement of the new area will be carried out. Transfer of settlers will be undertaken through the provincial dept. of agriculture. Under the resettlement policy some 190 families have been, since the middle of summer, removed from the dry area to various points in North Alberta, and it is expected that the movement may total to 400 families.

Autumn Grasshopper Battle.

Possibility of another grasshopper outbreak in South Alberta next spring has led the provincial department of agriculture to issue special warning to farmers to fall-cultivate the land infested. Plowing infested stubble is the most effective tillage practice, but this must be done six inches deep with a mould-board plow, with the furrow slice inverted. Where this cannot be carried out satisfactorily, shallow cultivation with a disc, cultivator or harrows, is recommended. Hopper eggs have already been noticed as far north as Elmo, Rumsey and Delburne.

Junior Farm Clubs.

Junior farm clubs in Alberta have reached their highest record this year, numbering 170, with over 2,800 members, a considerable increase over last year. Nine projects are involved, including wheat, oats, barley, alfalfa, potatoes, corn, beet and dairy calves, and swine. Over 40 fairs will be held by swing club members during the next few weeks.

Open Season for Ruffed Grouse.

Closed season on ruffed grouse has been closed for the time being, and shooting of these will be permitted between October 1 and 15, north of the Coronation line C.P.R. and north of the Red Deer River, west of a point near Nevis.

Calgary Celebrates an Anniversary.

During the last week Calgary celebrated a unique anniversary, that of the arrival of the first passenger train into the settlement 50 years ago—September 28th, 1883.

CAMILLA HOYT
Young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On his return, Peter spends most of his money to save Camilla a good time, and then decides he must give her up because he cannot stand the financial pressure. A chance meeting, however, gives the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter then confesses his own pennilessness. They fall in with other's arms. (Now Go On With The Story.)

CHAPTER VIII.

When Camilla and Peter had gratified the weeks of their longing for love of each other with incoherent words and repeated kisses, Peter held her off and exclaimed, "To think I near I care to losing you! And I should have, if you had not told me the truth!"

"That was why I dared to tell you, because I had to. And at the same time, I was sure that when I did it would be the end. There is no explaining what things happen, is there?"

Peter was silent for a minute, then turned aside from her suddenly and exclaimed, "But, Camilla, don't you see, dear—your not being Miss Hoyt makes it all the more impossible for you to love me."

"What do you mean, Peter?" alarmingly.

"Because I have no money, either. I can't take care of you—oh, for years—perhaps never. Mrs. Hoyt is right—you must find someone to love who has plenty of money to take care of you."

"But didn't I just tell you that I was preparing to take care of myself?"

"Oh—that! For awhile—yes. But you must think of your future."

"That is just what I am thinking of—what my future would be without love."

"Surely, there is someone you could care about who has money and influences that will give you the happiness you deserve." He did not sound very convincing but he was trying to be generous.

"There is no one in the world who can make me happy, except you, Peter." She pressed her head close on his shoulder like a torn child seeking protection.

"Precious! Camilla, you make me wild. If only I could make you happy!"

"You can if you love me enough," softly.

"Love you! I love you too much! But I can't take care of you for ever so long, and perhaps I never could give you what you have had."

"Will you stop saying that, Peter?" she demanded severely. "I don't want the things I have had—ever. I want you—oh, Peter, darling, I love you so! Don't send me away from you!" Her hands reached up and clasped around his neck. Her lips tilted to his. Peter took them, eagerly, lost to all practical reasoning.

They murmured together, "I won't, darling, I promise. We'll find a way."

Presently, it was Camilla who drew away suddenly and exclaimed, "Why, Peter, it is you who should marry a girl with a fortune, so you can be free to study and work. You are going about the world, learning everything about you. I'm sorry I forgot some side of it. Peter dear, I'll go away and take care of myself and some else." Now it was Camilla who tried to be cheerful and convincing and generous.

Peter drew her close with an indulgent laugh. "You precious little pose! What should I have to work

for if I lost you? Having you would be my surest chance of success, Camilla. With you for my inspiration, the sky's the limit for me. We shall dream and work together, you and I. There are dreams in your eyes, that promise me so much, darling. How we shall live together!"

"You are sweet!" she told him, timidly caressing his face.

"But I haven't told you all about me, dear. I have no family here except some older brothers and sisters who are married and involved in their own affairs. I lost my mother and dad when I was only a kid, and I lived with my oldest sister until I could take care of myself. I wasn't very old when I started on my own."

"Such a brave little fellow you must have been! Why should I be afraid that you can't take care of me some day, then?"

"Well, that's different. I get along somehow on very little. You are sure you don't mind that? I can't afford to live in the stately houses, and my mother was shaved over her head?"

"Why, Peter Anson! Why should I mind that? So did my mother come to America with a shawl over her head and suffer the bewilderment and fears of Ellis Island."

"What's the difference, anyway?" she continued, "just a few generations? We all came from across the Atlantic, yet the first arrivals scorn the later ones. Because they beat us to it, I suppose. But as soon as the biggest high-hats have prospered with

held her away to exult in her beauty. Shall I tell you what you remind me of?"

"Please do! I hope it is something very nice!"

"Everything nice—of sunny southern skies and brilliant flowers, intoxicating fragrance and sparkling blue waters, of glamorous tropical moonlight and music and gay laughter."

"I hope I always shall remind you of such lovely things, Peter."

"Happy, dearest?"

"So happy. I shall never be unhappy again."

"Or blue?"

"Nor blue!"

After awhile, he said, "But we've been planned for the future at all,

"Do I Still Remind You Of An Iceberg?"

freedom and the democracy that they never practice, they go back where they come from. Then they go back to exploit their wealth to the poor relations they left behind, to buy continental culture, to absorb the genius of foreign masters or revel in the historical grandeur of the old world. Even you believe that to complete your education, you must go abroad. Then why are you ashamed to have come from there?"

"You are marvelous!" Peter, declared solemnly.

"So are you! Do you know what you reminded me of the first time I saw you?"

"Aye tank aye go home?" he laughed.

Her finger tapped his cheek with gentle reproach. "Of course not! Will you stop being ridiculous? You always make my think of Viking ships and brave adventurers in search of conquest and new lands. You are like your beautiful, brave country. Your hair is like the gold of the sun that never sets in that long northern summer, your strength is like the rugged cliffs of the coast-line, your eyes are like the sparkling blue ice of the stern winters."

He chuckled with joy at her delightful fancy. "Do I still remind you of an iceberg since I've kissed you?"

"No. I've changed my mind about you being an relation to ice. You must be the fire of the northern lights, the son of Aurora Borealis," she baited.

"Just for that, I'll burn you up," he warned her, kissing her again. He

there by doing anything I could—just as I've worked my way through National. Perhaps a guide or interpreter. I know French pretty well—and Swedish and Scandinavian."

"I have Spanish and French and some Italian," Camilla added. "We might start a foreign language school."

"Or build a tower of Babel."

"We'll let the children do that," she responded him, smiling.

"There you are! Now the children come into the picture. And you say I shouldn't change my plans."

"Oh, but that's a long time from now—when you are rich and famous, when your figures decorate the cities of the world."

"Why, I'll be so old then—" they layed together.

Camilla said presently. "Forgetting all that now, you must promise me Peter, to go right on with your work as you had planned before. If you don't, I shall go away and never see you again."

"You couldn't!"

"I shall if you let me hurt your work. I love you too much to hurt you like that."

"So much that you could leave me if you believed it would be better?"

"Yes, Peter."

"Oh, my dear!" his voice held awe.

"But you are to remember that losing you would hurt me now more than anything else that could possibly happen to me. Shall we both go to the same places as you have made them, for awhile, just seeing each other when we can, then?"

"Not going to the Majestic and the Madox, Oh, Peter, that was terrible. You must let me pay you back the money you spent that night."

"Don't say that, dear! If I always have as much pleasure from the money I spend as that gave, I'll get enough from life. Please don't mention it again."

"All right. But you must not spend your money on me again. We can walk and talk together in the park often, and have little picnics this summer when you are not too busy."

So they planned confidentially, as only lovers who know little of the caprices of life may dare; for to them, the future always beckons along a straight shining road.

Little Helps For This Week

"O the depth of the riches both of the wisdom and knowledge of God: how unsearchable are His judgments, and His ways past finding out"—Romans 11:33.

No star is ever lost we once have seen.

We always may be what we might have been, though only thought has life and breath.

Saints good, though only thought, has God's life can always be redeemed from death.

And evil in its nature is decay.

And any hour can blot it all away;

The hopes that last in some far distance seen

May be the true life, and thus the dream.

—A. A. Proctor.

St. Bernard has said: "Man if thou desirest a noble and holy life, and unceasingly prayest to God for it, if thou continue constant in this thy desire, it will be granted to thee without fail. And if God has not given it to thee, thou shalt find it in H in eternity: of this be assured." Therefore do not relinquish your desire though it be not fulfilled immediately, or though you may swerve from your aspirations or even forget them for a while. The love and aspiration which once existed live forever before God, and in Him ye shall find the fruit thereof; that is, to all eternity, it shall be better for you than if you had never felt them.—J. Tauler.

Train Accidents

Seven Passengers Killed On Canadian Roads Last Year

Last year there were seven passengers killed and 339 injured in train accidents, the Dominion Bureau of Statistics says in a report issued recently. This was an average of one killed for every 3,000,000 carried, and one injured for every 62,000.

Injuries to passengers ranged from scratches and bruises to more serious injuries. Two passengers were killed in collisions, two fell from trains, two were killed getting on or off trains, and one from other causes.

There were 57 employees killed in train accidents and 957 injured, says the report, a low record for the last 22 years. There were 94 persons killed at highway crossings, of which 73 were motorists, and of this number 30 were killed at protected crossings.

Waterspot Chases Ship

Huge Volume Of Water Follows Liner Five Miles

A waterspot playing tag with an ocean liner was the adventure experienced by passengers on the "Duchess of Bedford" during a violent wind storm. The liner was on her way down the St. Lawrence from Montreal to New York on a cruise.

The giant spot, which measured 60 feet across the base and at times as much as 500 feet in height, chased the liner for almost five miles at a speed of approximately 17 miles per hour, passengers reported.

Passenger plans to build many schools.

WEAK WOMEN

Take Lydia E. Pinkham's

Vegetable Compound

Are you ever fatigued that you were too weak to do anything . . . that you did not have the strength to do your work?

Are you weak, worn and languid? Should a tonic such as Lydia E. Pinkham's Vegetable Compound, Headache and Backache, that are the result of nervous debility, rather common among women, be of service to you?

"98 out of every 100 women who write to us say that they are helped by Lydia E. Pinkham's Vegetable Compound taken as directed from their druggist today . . . and watch the results."

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

Without Calomel

You are "feeling pink" simply because your liver isn't pouring off daily two pounds of liquid waste products. These wastes are largely bile, which is bad hamper, and your waste system is bad pump.

With a liver that is not a mere water reservoir, you are a healthy person. You are a strong, energetic person, and you are a good liver.

Take Carter's Little Liver Pills. Purely vegetable, they contain no calomel. They are safe, and can be taken by name. Receive substitute.

Give any man half a chance and he will say something that he will regret later.

Mountain View Notes

The regular monthly meeting of the W.L., postponed on account of threshing operations, will be held on Thursday, October 5th at the home of Mrs. Harry Pearson in Didsbury.

Mr. and Mrs. J. Rosenbarg were visitors in the district Sunday last.

A recent letter from Blackie district reports threshing as completed; the crops poor, and gardens dried out; potato crop very light, and no vegetables to speak of. Mountain View should consider itself fortunate this year.

King Sol at last prolonged his stay and threshing gangs have been going on high all around the district, as many as seven machines being viewed in one morning and all swing. The storm winds Thursday night, Friday caused the men considerable inconvenience, and some rolled in at night feeling very weary, but one lad on a gang still had enough energy to pull forth his mangelwurzen and play some well known tunes, ending with the melody of "Home Sweet Home." No doubt, he, as well as those who listened, longed for a sight of the familiar faces.

The school fair held in September at Community Hall was well attended, and the exhibits of schools, garden produce and livestock were worth anyone's time to view. The splendid work of the pupils of each school caught the eyes of many keen observers. As the correspondent lives near Moma, naturally more is known of this school's exhibits and prizes. Mary Mosley was one of the largest exhibitors and took many prizes in schoolwork, needlework and cooking. Having won prizes in the latter, Mary proved a great help when the threshing was over as she helped with the "specials" for them. The McNeil girls from Rosedale appeared to be large exhibitors and were awarded many prizes. Jutland won the shield for the most points. Mrs. Garnett Tingle was observed leaving the building after the fair, carrying a huge pumpkin exhibited by her children. These fairs certainly create great enthusiasm among the children to do their best and we hope that the fairs will not be dispensed with, even if our government cannot see fit to give the necessary financial aid. The teachers of each school are to be congratulated on their untiring efforts, (no small work in a busy rural school with a heavy curriculum to cover in a limited time).

Burnside Notes.

Messrs. Percy Saunders and Fred Dell spent a few days in Calgary this week.

Mrs. Hugh McLean and daughter Tenia spent a few days last week in the southern city.

Mr. and Mrs. Leon Dell have moved in with Mr. Sam McAllister for the winter.

Mrs. Otto Bittner spent last Friday at the home of Mrs. Noah Eckel.

Mr. Albert Wall, Miss Helen Pross, Howard and Lester Pross, spent Sunday with Mr. and Mrs. Otto Bittner.

Mrs. Hugh McLean received the sad news of the death of her brother, Alex Cameron, who was killed in a mine accident in North Manitoba last week.

Mr. Harold Metz, eldest son of Mr. George Metz, was married at Calgary on Monday, September 25th to Miss Laura Wolford, of High River. The newlyweds spent a few days here visiting the groom's father and other relatives before leaving for their new home at Fort St. John in the Peace River Block.

Rev. W. W. Kruger, D.S., of Regina, will preach next Sunday morning at Zion Evangelical Church. The sacrament of the Lord's Supper will be observed. In the evening the pastor's sermon subject will be: "God's Love."

"Enraged" volunteers to do the work of painting the street and steeps, if the Pioneer Office if "Observer" or of "Kritik" know where to leave the materials mentioned in his criticism in last week's Pioneer at the office of the latter.

Melvin Notes

Mr. and Mrs. Ed. Parker are visiting friends at Saskatoon.

Mr. and Mrs. Harold Bliss, of Bowden, spent Sunday with Mr. and Mrs. August Krebs. Mrs. Bliss remained over a few days visiting with her parents.

The hum of threshing machines has pervaded the district for the last two weeks, but with this grand fall weather all threshing has now been completed.
